pluggz

By TheCelebrityCafe.com, 4/26/2013

One of our most favorite feelings is walking barefoot on the grass. Ever wonder why it feels so good? It's because the earth is a natural energy source, and by walking barefoot we are able to absorb its energy in the form of electrons.

Electrons can make you feel happy, boost your self-confidence and give you a positive outlook. They help neutralize nasty free radicals that cause discomfort, pain, inflammation, listlessness, and begin to heal you from the inside out.

Shoes and sandals interfere with that transfer of energy ... until now. Pluggz has designed a comfortable and practical shoe that features a black plug made from their custom carbon and rubber compound. That plug ensures a free flowing conduct of electrons from the earth to our bodies, giving your body what it needs to heal itself, stay balanced, and feel happy.

Pluggz ballet flats and flip flops would make a fantastic gift for Mother's Day. Pluggz classic ballet flats are made of supple, full grain leather and linen, with patent leather or leather toe caps and come in black, taupe, bronze, ivory, pewter and tan for \$129.

Pluggz ballet flats in color are also made of supple, full grain leather with matching leather toe caps but come in blue, pink, saffron and black for \$129.

And for the warm summer months, enjoy pluggz flip flops in gold, silver or black for \$39.
