

Editor's 'Everyday Items' LOVE List

Written by Magaly Fuentes-Sagan - Sunday, 08 December 2013

[Pluggz](#)

[Pluggz](#) flip flops: Pluggz created a flip flop, along with their line of stylish flats, that contains black plugs made from a custom formulated carbon and rubber compound that sit under the weight bearing part of the foot. This proprietary plug feature allows people to get grounded when walking on grass, sand, soil -- even concrete city sidewalks. For someone who lives in Florida for a large part of the year and wears flip flops almost year round, these are durable, comfy and in black, can be worn with almost everything.
