

3/18/13

Aside from having a chic Chanel-esque look, we love what these soft leather flats do for our feet. Walking on grass or sand feels good because we are absorbing the Earth's energy. Pluggz have a small carbon and rubber fitting that allows for the free flow of electrons between your foot and the ground. You may feel a small sensation, or more balanced and energized with less foot pain. And with super-soft padding, moisture wicking insoles and lots of arch support, Pluggz are sure to be your go-to flats. Shop flats, mary janes and flip flops at pluggz.com.
